

ABSTRACT

1
The present invention relates to internalizing peptides which facilitate the uptake
and transport of cargo into the cytoplasm and nuclei of cells as well as methods for the
identification of such peptides. The internalizing peptides of the present invention are selected
for their ability to efficiently internalize cargo into a wide variety of cell types both *in vivo* and *in*
6 *vitro*. The method for identification of the internalizing peptides of the present invention
comprises incubating a target cell with a peptide display library, isolating peptides with
internalization characteristics and determining the ability of said peptide to internalize cargo into
a cell.
